Subject: MLPAComments:

I support package # 1 for the Carmel area. As a responsible kayak fisherman and freedive spear fisherman, I request that the Cypress Pinnacles be left open to fishing, because the boundaries will be very difficult to discern, and it is the only offshore protected area that can be gotten to by kayak on any given day of the year. Please remember that kayak fishers and divers are fishing in this manner *because* we support a healthy fishery and environment. Thank you.
